Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Upon reconsideration of the record in this application, the previous indication of allowance is withdrawn and a new basis for rejection is set forth below. Accordingly, this is a non-final Office action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 7 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Tashiro et al. (U.S. Patent No. 6,705,774 B2).

Tashiro et al. shows a housing by reference numeral 50; a standing structure for standing installation provided for the housing by the apertures 2a in the bottom of the base 2 and the camera holder 11; a wall-mounting structure for wall-mounting installation provided for the housing by the apertures 2a in the bottom of the base 2 and the camera holder 11; a camera by reference numeral 9; and a camera rotation device by reference numeral 5. Tashiro et al. discloses a shooting window 60 facing in a slanting direction with respect to a horizontal direction in both standing and wall mounting directions (see Fig. 4 and column 4 lines 10 and 11 disclosing that the camera faces at about 10 degrees from the horizontal). Note column 3 lines 64 and 65 describing the base 11a is provided with an adhesive area or screw hole for securing the camera apparatus on the ceiling, wall, floor, etc.. Notice that the camera 9 is shown in the

Art Unit: 2851

drawings as housed in a dome shaped element. When the camera holder 11 is mounted onto a wall by the portion 11a, the apertures 2a in the bottom of the base become a wall hanger. It is self-evident that when mounted high on the wall near the ceiling the camera window 60 would face downward and when mounted on the wall near the floor the camera window would face upward. Tashiro et al. discloses all claimed structure.

Allowable Subject Matter

4. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for indication of allowable subject matter in claim 6 is the claim limitation that the housing has an approximately triangular prism portion composed of a standing installation surface, a wall-mounting installation surface, and an incline provided with the shooting window.
